LANGUAGES

- English (Fluent)
- Oromo(Native)
- Amharic (Native)
- Somali (Intermediate)
- Tigrigna (Intermediate)

ABOUT ME

I am an aspiring full stack developer with a background in health sciences, driven by curiosity and a passion for technology. I have dedicated myself to learning web development through online courses and hands-on projects, gaining experience in HTML, CSS, JavaScript, React and Node.js. Despite challenges like lacking a mentor and a structured learning path, I have remained committed to improving my skills and building projects that demonstrate my growth. I am eager to continue learning under guidance, strengthen my full stack development abilities, and contribute to meaningful applications. This scholarship will help me achieve my goal of becoming a skilled developer who can create impactful solutions.

PROJECTS

Portfolio

- I developed a personal portfolio website using only HTML and CSS, showcasing clean design, responsive layout, and attention to detail without relying on JavaScript."

ToDo-List App

- Built a dynamic task management application using HTML, CSS, and JavaScript, allowing users to add, edit, and delete tasks while practicing DOM manipulation and event handling.

Apple Home Page

- Built a responsive clone of the Apple homepage using React and CSS, replicating the layout, navigation, and interactive elements. This project enhanced my skills in component-based architecture, responsive design, and modern front-end development practices.

Weather App

- Developed a responsive weather application with HTML, CSS, and JavaScript that fetches real-time weather data, helping users check weather conditions in different locations.

Calculator

- Created a functional calculator using HTML, CSS, and JavaScript to perform basic arithmetic operations, enhancing understanding of JavaScript logic and user interface design.
